

MEASURING AND SWITCH TERMINAL BOXES

Description

In order to make the reading operations faster, sometimes the signals of two or more sensors are grouped into measuring and switch terminal boxes from which, connecting with the portable reading unit using the supplied cable and with the simple use of a channel selector, you can display data from all sensors installed. Measuring and switch terminal boxes from Gestecno are designed for various business needs and are produced in various sizes according to their capability in relation to the number of sensors that can be connected.

Technical Features

Input number	12 channels
	24 channels
	36 channels
Switches number	1 (12 channels)
	2 (24 channels)
	3 (36 channels)
Dimensions	300*220*160 mm (12 channels)
	300*220*160 mm (24 channels)
	400*300*200 mm (36 channels)
Material	Plastic material enforced by fibres
Class of protection	IP66

Please specify

CODE	PRODUCT DESCRIPTION
PAN-120	Switch terminal box 12 channels
PAN-240	Switch terminal box 24 channels
PAN-360	Switch terminal box 36 channels
