

OVERVOLTAGE PROTECTION

Description

Overvoltage protections provided by Gestecno come in three types and are used to prevent unwanted lightning strikes to the tools which they are connected to. They are located in junction boxes that can be equipped with 2, 4 or 6-wire instruments.

Please specify

CODE	PRODUCT DESCRIPTION
PST-100	Overvoltage protection for voltage or current output
PST-200	Overvoltage protection for mV/V output
PST-300	Overvoltage protection for voltage or current input
PST-400	Overvoltage protection for mV/V input

Technical features

Models	equipped with 2, 4 e 6 conductors
Type of protection	3 stages
Connection cables	IP67 strain relieves
Case	ABS
Class of protection	IP67
